

DID YOU KNOW?

DDGs account for **7.8%** of
TOTAL domestic CORN USAGE

DDGs are an economical source of energy and amino acids, which makes them a great component for feed rations in livestock production

The U.S. ethanol industry produces 90,000 tons of DDGs weekly

Drying increases shelf life which allows the product to be shipped further to access other markets

U.S. Top DDGs Customers:

Mexico

Vietnam

South Korea
