

NATIONAL CORN YIELD CONTEST[®]

Yield Verification Photo - NEW for 2021

To add transparency and visual confirmation to high-yield entries, 2021 NCYC will require a photo inclusion to be submitted online with the recheck yield results. Photo will be mandatory but will not be used to disqualify entries.

Photo submission guide:

- Photo must be a sample section of the recheck rows to be harvested - NO outside rows
- Straight shot picture of the two supervisors holding either end of a yard stick at corn ear level
- Ears in the photo of the recheck plot stand must be shucked back
- If twin row corn is planted, both rows must be shucked back
- Photo to contain one diameter of a broken ear (taken next to the 36" parameter of the photo being taken) to capture image of the kernel depth
- Supervisors' faces must be visible
- 36" length of the tape measure may be used if yard stick unavailable
- Supervisor must count and record the number of ears captured in the 36" photo and note it on the Yield Worksheet
- Photo will be submitted in the online program as an attachment when submitting the recheck yield
