

Max Harman
Michigan State University

Max Harman is a first-year PhD student studying Genetics and Genome Sciences and Molecular Plant Sciences at Michigan State University and the MSU-DOE Plant Research Lab, where he works on plant metabolic engineering and the upper limits of photosynthesis in the lab of Dr. Berkley Walker. Having grown up on a farm in rural Kansas, Max is deeply committed to using biotechnology to improve the lives of both producers and consumers globally and ultimately hopes to tackle these challenges head-on as an industry R&D scientist.
